

Composite Fencing

Elegant modern composite fencing system that will enhance any garden.

Easily installed aluminium posts are available with two different anchoring systems: bolted directly to pre-existing concrete base using flat bottomed supports; or impaled in concrete using spike supports. Featuring 4 separate slots, the aluminium posts allow for multi-directional installation - straight, 90° or T-section.

Boards can be used as replacement panels with our unique composite post adaptor - simply slot the composite post adaptor into the concrete channel in existing concrete posts and slide the boards in place. Use in conjunction with the starter rail and finishing trim kit to complete the look.

Another unique development is our aluminium trim to allow you to install in front of existing neighbouring fencing using our top and bottom trim. Fix the aluminium trim into the concrete channel and insert the fence boards into the aluminium U-channel in conjunction with the starter rail and finishing trim kit.

Hollow fence boards available in grey and brown with a woodgrain effect finish to both sides.

- ◆ Better. Long-lasting and durable, will not rust or rot.
- ◆ Faster. Quick and easy to install.
- ◆ Safer. Strong, impact resistant, split and splinter-free.
- ◆ Woodgrain effect finish to both sides.
- ◆ Low maintenance - no additional oiling or painting required.
- ◆ Ideal for replacement panels or new build projects.
- ◆ Fade resistant (can fade up to 10% in the first 6-8-week period, thereafter stable).
